

Frame & Stake Guide

Our **FRAMES** are metal and coated with a black enamel finish. We offer four different sizes of these durable frames. No bolts or screws are used to hold the sign panels. Instead, we use zip-ties to ease the changing of a sign panel.

Our **STAKES** are metal and we offer three types. The Stake Frame and Heavy Stake are coated in a black enamel finish for more durability. The Stake Frame is for an Open House sign. The Heavy Stake is meant for a medium to light sign. The Galvanized Stake is typically for light Directional signs.
